SYNTHETIC DEMO - NOT FOR ENGINEERING USE

Project BETA - Aviation fuel filter vessel

1. Scope

Fictional training document for specification review.

No real company, customer or project information.

2. Process data sheet

Design pressure: 10 bar(g).

Design temperature: -10 to +50 deg C.

Rated flow rate: 85 m3/h.

3. Mechanical requirements

Design pressure: 16 bar(g).

Vessel material: EN 1.4404 (316L).

Design code: applicable international standard.

Corrosion allowance: 1 mm.

4. Review note

Resolve discrepancies between process and mechanical data.
